

Let's Hike

Resilience in Community Plant Walk

Slow down, listen, and communicate with the rich diversity of flora and fungi that make their home at Muddy Hollow. In this plant walk, we'll cultivate meaningful, serendipitous encounters with our green-blooded neighbors.

Difficulty Level: Easy

Mileage: ~2 miles

Marine Mammals at the Headlands

Point Reyes has been called "like pinniped heaven." Head to the mouth of Drakes Estero to take in the estuary and learn more about marine mammal lifecycles and the park's pinniped monitoring and conservation work.

Difficulty Level: Easy

Mileage: ~3 miles

A Vision for Healing Coastal Prairie

Explore the beauty, function, and importance of Point Reyes coastal grasslands, learn how the park monitors this part of the landscape, and discuss visions for restoring this critical ecosystem.

Difficulty Level: Moderate

Mileage: ~2 miles

Elk Recovery Over Time

Point Reyes is the only national park unit where tule elk are found. Hike along the Point and enjoy spectacular views while learning about the area's unique ecology and current management practices.

Difficulty Level: Challenging

Mileage: ~5 miles

Fire's Role in the Ecosystem

Return to Sky Trail roughly five years after the Woodward and 30 years after the Vision Fire burned through the landscape. Hike along the Inverness Ridge and learn about the importance of fire regrowth and the park's fire management efforts.

Difficulty Level: Moderate

Mileage: ~4 miles

Coast Miwok History & Co-Stewardship

Join tribal leaders and staff from the Federated Indians of Graton Rancheria (FIGR) for a conversation and walk that explores the Tribe's special connection to Point Reyes National Seashore as their ancestral homeland.

Difficulty Level: Easy

Mileage: <1 mile
